REACH / SVHC / SCIP

In accordance with Article 33(1) of Regulation (EC) No 1907/2006, suppliers of articles containing SVHCs published in the official ECHA Candidate List in concentrations above 0.1% w/w must provide their customers with sufficient information to allow safe use of the article, including at least the name of the substance.

The articles listed in Annex I of this communication do not contain Candidate List substances (latest update 25.06.2025) in concentrations above 0.1% w/w and are therefore not subject to proactive notification. Circular economy is at the core of each of our foam solutions designs. Design for recyclability and the use of recycled materials support our commitment to reduce the carbon footprint of our foam solutions. Most of them contain a certain percentage of recycled content. We carefully source these recycled materials from responsible European suppliers. Recycled materials are variable. To the best of our knowledge these high-quality recycled materials comply with the below listed norms and legislations.

For directives, regulations, and substances other than those listed above, NMC does not dispose of all the necessary information. Above listed statements are based on our current understanding of the regulatory requirements, our production processes and information provided by our material suppliers. Though dangerous substances are not added intentionally, the presence of impurities or insignificant traces due to contamination of materials cannot be excluded.
